

## Go Paperless Instantly – emSigner

Going paperless is easy, and yet difficult at the same time. After all, there's a lot to consider. Are eSignatures covered by local legislation? How do you manage the identity of the signer? Where does the data reside? Are you violating any privacy laws? Is it REALLY going to be easier than signing, scanning, uploading and emailing?

The list of questions is never ending. But the answer is easy. [www.emsigner.com](http://www.emsigner.com)

eMudhra's emSigner is a one-stop solution to going paperless. With emSigner, we have considered all your questions and ensure that our platform helps you meet your requirements no matter how large or small. Here are some use case one-liners to prove it.

- We have banks that use emSigner to sign trade finance agreements across 15 countries
- We have some of the largest eCommerce companies in the world using emSigner to recruit employees and onboard vendors onto their platforms across 5 countries
- We have educational institutions issuing digital diplomas to their students to not only go paperless but also prevent diploma fraud

That's only scratching the surface. If you have a plan to go paperless, or just want to talk about whether emSigner would be a good fit for you or your company, please reach out to us <https://www.emsigner.com/Areas/Home/contactus>
