

## emSigner: Helping Deliver IT Projects On Time, On Budget and On Value

Cost and time overruns have become a norm in traditional IT project management endeavors. No wonder, a recent Harvard Business Review study that analyzed 1,471 IT projects, found that five out of six projects witnessed a cost overrun of 200% and a schedule overrun of approximately 70 percent on average.

But this need not be the case going forward. Using emSigner, eMudhra's market leading paperless office solution with strong automation and workflow management capabilities, you can seamlessly digitize and automate mundane project management related activities or processes, and in the process help you deliver IT projects on time and within budget.

### Here are some of the highlights of our paperless offering:

- emSigner allows you to quickly digitize the creation, management and approval (by electronically signing) of documents related to project management such as project plan, scope of work, project business case, project charter, work breakdown structure, risk/issues log, project communication plan, meeting minutes (MoM), project schedule, etc.
- emSigner helps you create a single repository of documents accessible for project stake holders
- emSigner supports secure distribution of document within the project (internal/external) team  
emSigner provides comprehensive audit trail of every document
- emSigner supports encryption/decryption of project related documents
